Themes and Goals

Empowering Student Communities to Cultivate Healthy Climates

Examine the foundational nature of healthy climates in the prevention of sexual assault and sexual harassment at colleges, universities, and military services academies.

Promote student ownership and positive peer influence to reduce sexual assault and sexual harassment at colleges, universities, and military services academies.

Foster collaboration and dialogue among the research, practice, institutional leadership, and student body communities to advance prevention efforts at colleges, universities, and military services academies.

Encourage the integration of varying approaches and concepts to holistically address sexual assault and sexual harassment including primary prevention, character development, and socioecological factors.
